## GULBENKIAN INSTITUTE FOR MOLECULAR MEDICINE

LISBON, PORTUGAL

2026–2025

### GIMM

Gulbenkian Institute for Molecular Medicine

The result of a merger between the Gulbenkian Institute of Science (IGC) and the Instituto de Medicina Molecular João Lobo Antunes (iMM), currently operating in Oeiras and at the FMUL/ULS Santa Maria in Lisbon, GIMM —while presently based across these two original sites— seeks a singular space for the effective fusion of all its capabilities and mission. This space is to be integrated into the Lisbon University City hub, maintaining a strong connection to the Santa Maria health park and the Faculties of Medicine and Pharmacy of the University of Lisbon.

Location: Avenida das Forças Armadas, Lisboa, Portugal

Client: Fundação Calouste Gulbenkian

Scope of services: Architecture and Landscape Architecture

Project brief: Project Design for the Future Facilities of the GIMM – Gulbenkian Institute for Molecular Medicine

Gross floor area: 20,000 sq. m (plus 7,000 sq. m underground)

Construction cost: EUR 56M (estimated)

Project status: Invited Design Competition

Rendering: 4+Arquitetos
